Sue Bustin:

In the feminist utopia we know that the world's soul is held in the hearts of birds and animals

Postcard

*Dear Mildred,
Salut! Here in Fem.Ut. everyone speaks French. It seems the language of love, of poetry, of fine cuisine has replaced that of international commerce and www. I think it also has something to do with honoring the great French feminist writers of the early 20th C. The food here is fantastic and the air filled with the sounds of happy kids and bird song. You must come here on your vacation next year!*
